PROFILE SUMMARY

Full-Stack Software Developer specializing in scalable backend systems, modern frontend interfaces, and mobile apps. Proven ability to deliver production-ready solutions using Java (Spring Boot), Node.js, React, and PostgreSQL. Fast learner with strong execution discipline, problem-solving mindset, and passion for building impactful products. Experienced across backend APIs, real-time communication, authentication, CI/CD, and clean architecture. Dedicated team collaborator with strong communication and adaptability.

PROFESSIONAL EXPERIENCE

Software Development Intern kLab Rwanda

Sep 2025 – Nov 2025
Kigali, Rwanda

- Developed full-stack applications using React.js, Node.js, Express.js, and PostgreSQL
- Contributed to UI/UX development and implemented responsive designs
- Integrated RESTful APIs and managed database operations
- Collaborated with cross-functional teams in agile workflows
- Debugged complex issues and optimized application performance
- Participated in code reviews and maintained high code quality

KEY PROJECTS

HavenHub – Full-Stack Hotel Booking System

Complete hotel booking platform built with Spring Boot backend and React frontend. Features secure authentication, room management, booking system, and responsive UI design.

github.com/Elissa100/HavenHub

SkillLink Frontend – Freelancing Platform UI

Modern freelancing platform interface with authentication, user dashboards, real-time messaging using Socket.io, and responsive design built with React and Tailwind CSS.

github.com/Elissa100/SkillLink-Frontend

SkillLink Backend – Node.js API with Payments

Scalable backend API built with Node.js, Express, and PostgreSQL. Integrated Stripe payment processing, real-time messaging, JWT authentication, and RESTful endpoints.

github.com/Elissa100/SkillLink-Backend

Collabris – Team Collaboration Platform

Team collaboration tool with secure authentication, real-time features, project management capabilities, and clean architecture design patterns.

github.com/Elissa100/Collabris

Kapee Shop – Full-Stack E-Commerce Application

Complete e-commerce solution using Node.js backend and React frontend. Features product catalog, shopping cart, order management, and payment integration.

github.com/Elissa100/Kapee-Shop
